

HRS IRB system transition.

First touch options for active studies.

First option is transition:

PI-initiated protocol transition before or at go-live.

Performed preemptively by the study team.

RAMS IRB amendment: select Convert to Protocol Template

OR transitions via modification in the new system after go-live.

Second option is modification:

Update with first study modification.

Transition to protocol template with first non-personnel study change after go-live.

Note that personnel-only mods may be submitted without transitioning.

Third option is continuing review:

Submission of a MODCR.

Transition to the protocol template at the time of required continuing review for non-exempt studies open to new enrollment and/or intervening/interacting with participants, exclusions apply.
